# **L Series** front loaders: the perfect match for Landini tractors.

The growing use of front loaders for a variety of applications has led Landini to expand its product line with the addition of a front loader range.

Landini front loaders are factory fitted on the **4, 5, 6H, 6C and 7** tractor series. For all the other models, they can be purchased as aftermarket equipment from Argo Tractors Spare Parts

Division. The L Series front loader range includes four models – **L60B/C, L80B/C/P, L100B/C/P** and **L120C/P** – with lift heights at pivot ranging from 3.45 to 4.15 m and lift capacities at 2m lift height ranging between 1200 and 2400 kg. (Lift capacity is measured at 180 bar working pressure at base of implement 900 mm ahead of pivot).

Landini front loaders are designed with strength, safety and comfort in mind. The boom is built with high-strength steel rectangular hollow sections designed to provide superior torsional and bending strength.

The front loader also features a twin-accumulator suspension system (single-accumulator for L60B / L80B / L100B models) which absorbs impacts on rough terrain. This improves ride comfort and makes for more efficient handling of bulk goods, while minimising power loss at constant speed.

Landini front loader range is complemented by a wide choice of implements which can be ordered from Argo Tractors Parts Division.

Implement range includes general purpose buckets, light material buckets, manure forks, round bale spikes, pallet forks and combi forks. All these implements will enable the user to perform a variety of transport and handling operations, road maintenance activities and any other tasks requiring a front loader.

## EASE OF USE AND QUICK LOADER MOUNTING AND DISMOUNTING

Specially designed to suit the Landini tractor range, L Series front loaders are extremely rugged and versatile. The front loader is comfortably operated from the tractor cab via a multi-function joystick. The tractor cab is also equipped with a transparent roof

hatch for extra visibility during loader operations. An exclusive connect/disconnect system enables the operator to remove the loader from the tractor in a few minutes. The Euro implement holder also makes it easy and quick to mount and dismount implements.

**Front loader unlock lever**

Two unlocking handles make it easy to connect and disconnect the loader from the tractor frame.

**Front loader mounting frame**

The loader mounting frame is specially designed to perfectly fit Landini tractors, making mounting and removing the loader quick and easy. It also ensures unobstructed forward view and provides best access to engine maintenance points even when the front loader is fitted.

**Quick-connect multi-coupler for tractor/loader hydraulic connection**

The hydraulic connection between tractor and loader is made via quick-connect multicoupler which makes loader removal easy and quick.

**Front loader removal and parking**

To remove loader from tractor, lower implement until it rests on the ground, lower parking stands, then disengage loader and disconnect hydraulic hoses. Lastly, slowly back tractor away from loader.

The loader joystick is located on the driver's right-hand side.

The joystick provides six main functions for operation of front loader and implements:

**Joystick pos. 1:** Boom lowering.

**Joystick pos. 2:** Boom raising.

**Joystick pos. 3:** Implement rollback.

**Joystick pos. 4:** Implement dumping.

Position 3 and 4 are activated by pressing the electrohydraulic pushbutton control (P) integrated into the joystick.

This enables implements with additional hydraulic functions, such as wrapped round bale clammers or manure forks with grapple, to be operated via a solenoid valve fitted on the loader front. The P pushbutton will enable operator to switch from the implement rollback and dumping positions 3 and 4 to the additional hydraulic functions (pos. 3P and 4P).

The joystick is also equipped with a sliding ring which locks out all functions for increased safety

Landini front loaders are equipped with Euro implement holder enabling the use of a wide range of implements (fig. A).

A two-port solenoid valve can be optionally mounted to the loader front frame to operate cylinders on implements with additional hydraulic functions (fig. B).

The lift cylinders are equipped with two nitrogen accumulators to cushion loader oscillations arising during the ride. This results in smoother operation and enhanced driving comfort (fig. C).

## 7 Series (6 Cylinders)

Model	160	180	200	220	230
Front Loader	L140P	L140P	L180P	L180P	L180P

### Specifications

MODEL	160-180	200-220-230
FRONT LOADER	L140 <sup>P</sup>	L180 <sup>P</sup>
Tractor power hp	120-180	+ 150
Lift capacity at pivot * m	4.27	4.50
Lift capacity of pallet fork at ground level kg <sup>(1)</sup>	2910	2900
Lift capacity of pallet fork at 2m lift height kg <sup>(1)</sup>	2545	2560
Lift capacity of pallet fork at maximum height kg <sup>(1)</sup>	2125	2300
Digging angle (at ground level)*	49°	48°
Dump angle (at full height) *	54°	63°
Lift cylinder OD (Ø mm)	Ø 80	Ø 90

<sup>(1)</sup> Bolted teeth - L. 0,82 m. - <sup>(2)</sup> Removable teeth with bolts - L.g. 0,87 m. - <sup>(3)</sup> Approximate weight.

## MULTI-PURPOSE BUCKET AV

Multi-purpose bucket av - 3rd function required			
	WIDTH (M)	CAPACITY (L) <sup>(1)</sup>	WEIGHT (KG) <sup>(2)</sup>
MBV140 - 5 TEETH	1,20 - 1,40	585	220
MBV150 - 6 TEETH	1,30 - 1,50	655	235
MBV170 - 7 TEETH	1,50 - 1,70	750	250
MBV190 - 8 TEETH	1,70 - 1,90	845	265
MBV220 - 9 TEETH	2,00 - 2,20	990	320

<sup>(2)</sup> Approximate weight.

## EARTH BUCKET

**EARTH BUCKET - Removable teeth**

	WIDTH (M)	CAPACITY (L) <sup>(1)</sup>	WEIGHT (KG) <sup>(2)</sup>
<b>BTB 130 - 5 TEETH</b>	1,30	345/450	183
<b>BTB 150 - 6 TEETH</b>	1,50	400/515	200
<b>BTB 180 - 7 TEETH</b>	1,80	480/625	230
<b>BTB 200 - 7 TEETH</b>	2,00	535/695	245
<b>BTB 225 - 8 TEETH</b>	2,25	600/780	265

<sup>(1)</sup> Actual capacity /Useful capacity. - <sup>(2)</sup> Approximate weight.

## MULTI-PURPOSE BUCKET

**MULTI-PURPOSE BUCKET - 3rd function required**

	WIDTH (M)	CAPACITY (L) <sup>(1)</sup>	WEIGHT (KG) <sup>(2)</sup>
<b>MB120 - 5 TEETH</b>	1,20	560	215
<b>MB130 - 6 TEETH</b>	1,30	625	230
<b>MB150 - 7 TEETH</b>	1,50	725	245
<b>MB170 - 8 TEETH</b>	1,70	820	260
<b>MB200 - 9 TEETH</b>	2,00	965	315

<sup>(2)</sup> Approximate weight.

## PALLET FORK

**PALLET FORK - Forged forks**

	CAPACITY (L) <sup>(1)</sup>	FORKS (MM)
<b>TP1650</b>	1650	1000 x 80 x 40
<b>TP2500</b>	2500	1200 x 100 x 45

Recommended for self-levelling front loaders.

## MANIP' BAL BRE 4

**MANIP' BAL BRE 4 - Round bale clumper**

	WEIGHT (KG) <sup>(2)</sup>
<b>BRE 4</b>	245
<b>BRE 4 - L</b>	130

Wrapped round bales Ø 0.90 m to 1.75 m (Max. weight 1200 kg). Synchronisation spring on both arms to facilitate self-centring. Integrated check valve to hold bale in place. 3rd function required. <sup>(2)</sup> Approximate weight.
